Welcome Message

Chair

Professor Hiroyuki Kamiyama, Hokkaido University, Japan

We are pleased to announce that the International Conference on Destinations, Events and Sports will be held from May 8 to 11, 2025, at Hokkaido University in Sapporo. This inaugural conference, co-hosted by the University of Central Florida's Rosen College of Hospitality Management, Hokkaido University, and The Hokkaido Shimbun Press, aims to provide an international platform for academic exchanges focusing on the future of tourism.

Tourism and hospitality management is a crucial field of study for building a sustainable future by maximizing the value that tourism brings to local communities and economies. This discipline plays a particularly significant role in the industrial development of Hokkaido and Florida, both renowned resort destinations where the three co-hosting organizations are based. Inspired by grassroots international exchanges between researchers in Hokkaido and Florida, this conference invites participants from around the globe to further expand networks and discussions.

To deepen discussions about the future of tourism, the conference will focus on the three key research areas of destinations, events, and sports, under the overarching theme of innovation and transformation. One of the challenges facing society today is the sustainable development of tourist destinations. Tourism not only creates temporary economic benefits but also carries the responsibility of preserving regional cultures and natural environments while contributing to peace through the appeal of these attractions and the exchange of people. To explore practical solutions together, we look forward to exchanging opinions with participants on these research areas and on challenges.

Hokkaido, the host location, is a premier resort destination in Asia. Its breathtaking seasonal beauty and rich cultural heritage will undoubtedly appeal to all participants. For Hokkaido University, this conference marks an important step towards its 150th anniversary in 2026 and serves as a milestone in strengthening industry-government-academia collaboration in the tourism sector.

We sincerely hope that many of you will take advantage of this excellent opportunity to participate in discussions that promise to contribute to the future development of tourism destinations, events and sports. We eagerly look forward to your participation and to the registration of your presentation topics.

We look forward to seeing you in Sapporo.

Greetings from the Organizers

Kiyohiro Houkin

President of the Hokkaido University

Good morning, everyone. Thank you very much for participating in the International Conference on Destinations, Events and Sports. On behalf of Hokkaido University, I would like to extend my heartfelt welcome to you all.

Tourism is a vital industry for the regional economic development and community revitalization of Hokkaido. At Hokkaido University, the Graduate School of International Media, Communication, and Tourism Studies and the Center for Advanced Tourism Studies engage in multifaceted tourism research, including tourism policy, tourism economics, regional development, and sustainability. Accordingly, co-hosting this international conference holds great significance for us.

In particular, given that Sapporo City, the venue for this conference, is preparing to establish a Destination Management Organization (DMO) in April 2026, this conference offers an exceptionally timely opportunity to deepen our understanding of destination management. I look forward to the opportunity for discussions with experts from around the world to enhance the competitiveness of tourist destinations and contribute sustainably to regional economies.

Our co-host, the University of Central Florida, boasts world-class hospitality management programs and provides cutting-edge insights into tourism industry development. Hokkaido University hopes to learn from their advanced expertise and apply it to the development of the tourism industry in Hokkaido.

I would also like to express my sincere gratitude to the Hokkaido Shimbun Press, with which we have cultivated a partnership over many years, for their generous cooperation in organizing this conference. The collaboration among industry, academia, and the media has created this valuable opportunity to bring together experts from Japan and abroad. Hokkaido's tourism industry has the power to drive the regional economy as a whole. Through this conference, I hope to see lively discussions that will further unlock the potential of tourism in Hokkaido and lead to sustainable development.

I hope this conference will serve as a forum for exploring the future of the tourism and hospitality industry, and for fostering new partnerships and developments. With these words, I would like to conclude my opening remarks.

Thank you very much.

Greetings from the Organizers

Dr. Cynthia Mejia

Dean of UCF Rosen College of Hospitality Management

The UCF Rosen College of Hospitality Management is proud to be a partner for the inaugural international conference on destinations, events and sports. Located in Orlando, Florida, the USA's premier destination for attracting and hosting sporting events, the UCF Rosen College proactively collaborates with its industry, education and government stakeholders to educate and develop the future leaders of these highly dynamic sectors within the wider tourism and hospitality industry. Underpinned by world-leading research and immersive industry experiences, we invest heavily in our students and faculty and remain committed to expanding their opportunities internationally. This conference serves as a perfect platform for their ongoing professional development and for the sharing of our collective experiences with our many friends and colleagues from Hokkaido and the city of Sapporo. In examining the contemporary innovations and transformations that are driving change across destinations, events and sports, this international conference demonstrates the power of international collaboration, the long-lasting impact of memorable experiences, and the ability of academic, industry and government partners to drive economic growth. We thank our friends from Hokkaido, Japan for their initial invitation to collaborate on this exciting adventure and wish all delegates from across the world an enjoyable, engaging and transformational conference in the beautiful city of Sapporo.

Dr. Cynthia Mejia, Dean of UCF Rosen College of Hospitality Management

Greetings from the Organizers

Yuji Horii

President and Representative Director
The Hokkaido Shimbun Press Co., Ltd.

We are delighted to announce that the International Conference on Destinations, Events and Sports (ICDES2025) will be held at Hokkaido University as the main venue. We are deeply honored to participate in this conference as a co-organizer.

Tourism, events and sports possess the tremendous power of bringing vitality and hope to local communities. As a media organization and a company deeply rooted in the community, Hokkaido Shimbun is committed to fulfilling its mission of reporting on the latest developments across Hokkaido and communicating the region's attractions and challenges.

Through events such as the Hokkaido Marathon, the Rugby World Cup and the Tokyo Olympic Marathon in Sapporo, we have been sharing the sense of unity and potential that sports bring to the community. In 2019, we were also involved in the launch of the Hokkaido Sports Support Network, a public-private partnership, and have experienced firsthand the power of sports to promote regional development and international exchange.

In recent years, with the sustainability of tourism being questioned, preparations are underway in Sapporo to establish a destination management organization (DMO), and there are high expectations for the development of new tourism strategies through public-private partnerships. Tourism, events and sports each offer distinct value, but their convergence creates powerful opportunities for regional development and transformation.

I sincerely hope that this conference will serve as a new step toward connecting the power of tourism to the next generation by bringing together the expertise and experience of the academic and private sectors.

I wish all participants a fruitful exchange and discovery through interaction with Hokkaido's nature, culture and people.

Greetings from the Governor of Hokkaido

Naomichi Suzuki
Governor of Hokkaido

It is with great pleasure that we announce the holding of ICDES 2025 and offer a warm welcome to all participants who have arrived in Hokkaido.

We recognize the great significance of this conference in Hokkaido, where global leaders in tourism and hospitality are tackling important challenges. The solutions and collaborations emerging from this event will be invaluable as we in Hokkaido pursue our goal of becoming a premier international destination.

It is our hope that the networks cultivated through active engagement will foster novel innovations and play a vital role in realizing sustainable tourism.

We sincerely wish for the success of this conference and the happiness of all participants. We also hope that you will take this opportunity to enjoy the natural beauty, cuisine, activities, hot springs, and other attractions of Hokkaido.

Greetings from the Mayor of Sapporo

Katsuhiro Akimoto
Mayor of Sapporo

We are delighted to announce that the first international conference on tourism hospitality management, "ICDES2025," is being held in Sapporo. We warmly welcome all participants from both within and outside Japan.

We understand that this conference will bring together experts from around the world to discuss various challenges in the tourism industry, including tourism marketing and sustainable tourism. As a city that prides itself on being a tourist destination, Sapporo views this conference as a valuable opportunity to further enhance its appeal as a leading tourism destination and to promote ongoing regional development.

During your stay, we hope you will enjoy the seasonal delicacies of Hokkaido and the harmonious blend of nature and urban amenities in Sapporo's streetscape. We sincerely hope that your visit to Sapporo will be a fruitful and memorable experience.

Keynote Lecture

09:30-10:20, May 9 (Room A)

Moderator: Dr. Alan Fyall (Univeristy of Central Florida, USA)

Session 1: Keynote Lecture 1

Role of Events and Sports in the Marketing of Oregon

Kevin Wright
Travel Oregon, USA

Kevin Wright will explore Travel Oregon's strategic approach to destination management, offering insights relevant to Japan's evolving tourism landscape. He will begin by examining past and current trends in Oregon's tourism industry, focusing on Travel Oregon's vision, mission, and funding model. Also highlighted will be the structure of Oregon's tourism ecosystem and the agency's collaborations and partnerships with key organizations throughout the state.

A central theme of the presentation will be Travel Oregon's 10-year vision, emphasizing how data-driven insights, strategic planning, and stakeholder collaboration shape decision-making within the agency. Kevin will explore how Oregon integrates branding and marketing initiatives, showcasing an "always-on" marketing approach that amplifies niche tourism markets such as culinary, outdoor recreation, and cultural experiences.

Travel Oregon's approach to event creation and support will be examined, covering major events throughout the state as well as Travel-Oregon lead initiatives such as The Governor's Conference on Tourism.

By illustrating Oregon's strategic and collaborative approach to destination management, this session will provide practical takeaways for tourism leaders, offering models for sustainable growth, stakeholder engagement, and long-term destination resilience.

Keynote Lecture

18:30-19:10, May 9 (Room A)

Moderator: Prof. Hiroyuki Kamiyama (Hokkaido University, Japan)

Session 9: Keynote Lecture 2

Emerging Trends in Tourism Statistics in the Context of Destinations, Events and/or Sports

Dr. Peter Laimer

Statistics Austria, Austria

Tourism is a relevant economic driver in many countries and might significantly impact the development of the nation. At sub-national and destination levels there is strong evidence that tourism is also a significant contributor to environmental, economic and social changes. Defining a tourism destination and/or region is a key issue for comparability purposes and it becomes a relevant issue when doing investigations related to statistical sources on national, regional and local levels, therefore.

The presentation deals with definition approaches of destination from the statistical perspective being the key and the pre-condition for further tourism related investigations on subnational level. Another focus of the speech is to show that measuring tourism on subnational/destination level is concerned with challenges since statistical sources don't usually include all levels of spatial units and small sample sizes do not allow data analysis on rather disaggregated territorial levels.

Furthermore, in particular the measurement of subnational tourism from a more holistic point of view will be given space in the presentation considering - among others - the rationale for such a broader view on tourism. In addition, experiences and best practices are going to be shared in regard to the measurement of tourism on subnational level, referring to the example of the European Union and to a selection of respective projects in Austria.

The presentation will try to foster and to enhance a common understanding, what tourism measurement on destination levels means and showing various limits this kind of research is facing. However, the contribution could encourage stakeholders in putting more emphasis on doing more research related to tourism data on destination level. Sharing experiences in this field could create additional awareness concerning the value of these data and improving a better understanding of tourism activities on subnational level.

Keynote Lecture

09:30-10:20, May 10 (Room A)

Moderator: Dr. Alan Fyall (University of Central Florida, USA)

Session 10: Keynote Lecture 3

Emerging Trends in the Hosting of Major Sport Events

James Bulley
Trivandi, UK

With over 30 years' experience of planning and operating major events, James Bulley will explore the trends shaping the future of major sports events and what they mean for hosts, event professionals and the industry as a whole.

The market size of major events reached \$1.7 billion in 2024 and is expected to grow to over \$2 trillion by 2032, underscoring their continued significance. New territories are fiercely competing to host much coveted major sports, recognising their power to drive national visions, economic development and international influence. Recent shifts have seen Qatar host the 2022 FIFA World Cup, Morocco and Saudi Arabia securing the 2030 and 2034 editions respectively, and India, Qatar and Turkey amongst the potential mix to host the 2036 Olympics.

Fans are increasingly seeking more exciting, immersive and hyper-personalised experiences with research showing that 45% of Gen Z attend live events to elevate their social status. We are already seeing the rapid growth of new, often shorter, sport event formats such as The Hundred in cricket, the T100 Triathlon, and the upcoming 'Ultimate Championships' in athletics. Whilst fan engagement is being revolutionised through technologies like Hawk Eye, VAR and DSR.

Innovations in technology will also redefine how major events are planned, operated and experienced. These include AI-driven efficiencies in resource management, optimisation of venue layouts and sustainable food waste disposal, as well as advancements in real-time crowd and traffic monitoring, fire-hazard detection and surveillance capabilities.

As the industry adapts to this rapidly evolving landscape, this session will address the critical need for the entire industry to work together to bridge the gap between academic research and real-world application. Translating new thinking into practical, scalable solutions will be essential to creating unforgettable experiences that not only captivate audiences, but deliver sustainable legacies, lasting value and measurable impact.

Keynote Lecture

14:30-15:10, May 10 (Room A)

Moderator: Dr. Alan Fyall (University of Central Florida, USA)

Session 14: Keynote Lecture 4

Sustainability Trends – a Destination Lens

Dr. Susanne Becken

Griffith University, Australia

This keynote explores how tourism destinations can engage in climate-resilient development, integrating both climate risk adaptation and the low-carbon transition. Addressing climate change at the destination involves tourism businesses, destination marketing organisations, but also involves a broad network of partners and stakeholders that need to work together to achieve the step change required. Building on net-zero destination research in Australia, decarbonisation pathways will be explored. The keynote will also discuss major climate risks for destinations, and here a focus on extreme heat impacts in global city destinations, including major events such as the Olympic Games, will be taken. Adaptation and mitigation actions-spanning waste reduction, nature restoration, and carbon accounting-will be connected as shaping tourism's future. Notably, the event sector has emerged as a leader, with strong engagement in nature restoration initiatives and evolving sustainability standards. I argue that this leadership is both an opportunity and a responsibility, requiring continued innovation to set benchmarks for the broader tourism industry.

Keynote Lecture

13:00-13:50, May 11 (Rusutsu Resort)

Moderato: Dr. Tadayuki Hara (University of Central Florida, USA)

Session 18: Keynote Lecture 5

Destination Planning for Events: A Portfolio Perspective

Dr. Alan Fyall

University of Central Florida, USA

Dr. Fyall will reflect on past trends in the marketing and management of destinations and identify themes for future research and practitioner adoption, before exploring the role events play in the planning, development, marketing, and management of destinations. Events are no longer a reactionary “add on” to destination strategies but are central to the development, and reinvigoration, of many destinations around the world. It is imperative that those charged with the leadership of destinations understand the dynamics of events, their power, and limitations, to affect change and how they can contribute to the development of more sustainable, resilient, and resident-friendly destinations.

Underpinning such understanding is the need for destination leaders to view events through a “portfolio” perspective and identify the grouping of events that can collectively deliver the most desirable outcomes for the destination at large. Such an approach to events involves strategically planning a diverse mix of events that appeal to different markets throughout the year, in turn reducing the dependency on a single major event and mitigating risks. A balanced event portfolio can also nurture community engagement, this in addition to building and/or enhancing the destination’s brand identity by highlighting its unique assets. For a portfolio perspective to succeed, collaboration among destination leaders, event organizers, government bodies, and relevant stakeholders is a necessity with important lessons for the future funding and governance of destinations. It also serves as a catalyst for destinations to strategically align events with broader economic and tourism goals. A portfolio perspective for destination events is intended to build resilience and adaptability, and to ensure destinations remain competitive and vibrant year-round to their tourist and resident communities.

The background features a series of concentric, overlapping circles in various shades of gray. Scattered around these circles are several circular icons containing symbols such as a person, a dollar sign, an envelope, a padlock, a bar chart, a speech bubble, a smartphone, and a laptop. These elements are interconnected by thin, light gray lines, creating a network-like or digital theme.

Program

Thursday, May 8 | DAY 1

*Time zone is JST

17:00 - 20:00	Conference Registration	Hall

ともに創る。北の空と大地の未来

HAPPY STORIES START*

北の大地に輝く、7つの星々。
それは降り立つ翼たちの目印。
旅の無事を人知れず支える、空の港の灯。
離れていたって、気持ちは一緒。
空港と空港、人と空港がつながったとき
北海道で紡がれる物語は、より輝くはず。
旅する人。住んでいる人。
みんなが心躍るストーリーが、
北海道エアポートからはじまります。

Hokkaido* Airports

2019年に設立した北海道エアポート株式会社は、新千歳空港、稚内空港、釧路空港、函館空港、旭川空港、帯広空港および苫小牧空港の7空港を運営しています。

公式HPはこちら

空港で一緒に
働きませんか

当社グループは、羽田空港における施設管理運営業、物品販売業、飲食業で事業を展開しています。当社グループの総合力で航空業界を取り巻く環境変化に着実に対応し、羽田空港が世界で最も評価される空港にするため、日々事業に取り組んでいます。また、羽田空港外への事業展開にも積極的に挑戦し、日本空港ビルグループ全体として企業価値の向上を目指していきます。

TO BE A WORLD BEST AIRPORT

羽田空港の旅客ターミナル運営会社として、世界で最も評価される空港の実現を目指します

空港評価総合世界第3位(3部門1位)

- ・空港の清潔さ
- ・国内線総合評価
- ・PRM (PERSONS WITH REDUCED MOBILITY)
※アクセスに特別な支援を必要とする人々のケア

総合評価部門 (World's Best Airports)

順位	空港名	国
1位	チャンギ国際空港	シンガポール
2位	ドーハ・ハマド国際空港	カタール
3位	羽田空港	日本
4位	仁川国際空港	韓国
5位	成田国際空港	日本

省エネ対策を中心とした取り組み

放射冷却素材”Radi-Cool”の導入

Radi-Coolは太陽光を反射し、自然現象の放射冷却を用いて室内の熱を放射することで、エネルギーを使わず室温を下げられる地球環境にやさしい製品として、旅客ターミナルビルのガラス面、パッセンジャーボーディングブリッジなどに導入しています。エネルギーを使わずに内部の熱を放射することで、環境負荷を低減し、カーボンニュートラル・脱炭素社会の実現に貢献します。
